DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-9, 23-25 and 27, drawn to a liquid crystal display with barrier ribs, an ink-jet color filter, and thin film transistor details, classified in class 349, subclass 43.
- II. Claims 10-12 and 26, drawn to a substrate having barrier lines formed in a single direction and an ink-jet color filter, classified in class 430, subclass7.
- III. Claims 13-22 and 28, drawn to a liquid crystal display comprising the features of II and I, classified in class 349, subclass 106.

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the barrier rib in invention I can be formed having a matrix shape instead of being formed in a single direction. The subcombination has separate utility such as being used in other types of displays besides liquid crystal displays.

Inventions III and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as the claims of invention II are evidence claims that indicate that the combination does not rely upon the specific details of the subcombination for its patentability. If the evidence claims of invention II are subsequently found to be unallowable, the question of rejoinder of inventions III and I must be considered and a letter to the applicant will so state. Therefore, since the combination evidence claims of invention II do not set forth the details of the subcombination and the subcombination has separate utility, inventions III and I are distinct.

Inventions III and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as the claims of invention I are evidence claims that indicate that the combination does not rely upon the specific details of the subcombination for its patentability. If the evidence claims of invention I are subsequently found to be unallowable, the question of rejoinder of inventions III and II

Application/Control Number: 09/492,802

Art Unit: 2871

must be considered and a letter to the applicant will so state. Therefore, since the combination evidence claims of invention I do not set forth the details of the subcombination and the subcombination has separate utility, inventions III and I are distinct.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(l).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Chung whose telephone number is (571) 272-2288. The examiner can normally be reached on Monday-Friday from 8:30 am to 5:00 pm.
